

# Mateus Badalotti

Senior Software Engineer (Contract) – SAP

✉ [mateus.badalotti@gmail.com](mailto:mateus.badalotti@gmail.com) ☎ [+55 54 981 295 962](tel:+5554981295962) 🇧🇷 Brazil 🌐 <https://badalotti.dev>

---

**Summary** Senior Software Engineer with 9+ years building scalable enterprise platforms globally, specializing in Java, Spring Boot, TypeScript, React, and cloud-native distributed systems.

---

**Experience** **Meta Brazil (Outsourced for SAP)** Remote  
Senior Software Engineer Mar, 2023 - Present

- Led end-to-end delivery of enterprise language-processing solutions using React, TypeScript, Node.js, Java, and Spring Boot in a global SAP environment.
- Supported enterprise language-processing services used by thousands of internal users across SAP's global ecosystem, ensuring reliable continuous delivery and production stability.
- Owned the design and implementation of the primary production delivery pipeline for all team-managed components.
- Drove full product lifecycle execution from technical design through production support in an agile, cross-functional team.
- Introduced AI-assisted, compliance-focused code review workflows, reducing PR review time by 10% and improving defect detection.

**Aggrandize (Outsourced for Lojas Renner)** Remote  
Senior Software Engineer Jul, 2021 - Mar, 2023

- Led technical decision-making across distributed e-commerce systems spanning frontend and backend services.
- Delivered an in-store digital commerce interface responsible for ~20% of physical store revenue.
- Designed and implemented CI/CD pipelines and development environments, significantly improving deployment speed and stability.
- Resolved critical cross-environment production issues across code, infrastructure, and integrations.
- Mentored engineers and acted as the primary technical reference for development and business stakeholders.

**Meta Brazil (Outsourced for Dell)** Remote  
Senior Software Engineer Dec, 2019 - Jul, 2021

- Led DevOps and infrastructure initiatives across global Dell environments using GitLab CI/CD, Ansible automation, and Grafana observability.
- Increased CI/CD maturity by 80%, accelerating delivery speed and operational reliability.
- Automated patching and configuration management for 200+ servers across Linux and Windows environments.
- Built unified real-time observability dashboards integrating business and operational metrics.
- **Led delivery of full-stack enterprise applications using Spring Boot, Java, Python, and Oracle technologies.**

## Compass UOL

Software Engineer

Erechim, RS, Brazil

Aug, 2015 - Dec, 2019

- Delivered new platform features and performance optimizations across high-traffic e-commerce applications, improving stability and user experience.
- Led reliable production deployments and incident resolution to maintain continuous platform availability.
- Integrated anti-fraud services, payment gateways, and digital wallet solutions (including Apple Pay) to expand secure transaction capabilities.

---

### Education

#### Atitus Education

IT - Information Systems

B.Sc.

Passo Fundo, RS, Brazil • Feb, 2013 - Jul, 2017

---

### Skills

#### **Backend**

Java, Typescript, Spring Boot, Python

#### **Frontend**

React, Vue

#### **AI**

Python, OpenAI APIs, AI-assisted development, Codex / Claude Code, Prompt evaluation & safety

#### **Cloud & DevOps**

AWS, Azure, GCP, Docker, Kubernetes, Observability, CI/CD, Security Engineering

#### **Data & Messaging**

RabbitMQ, Redis, SQL, Kafka, REST / GraphQL, Caching, Microservices Architecture

---

### Certifications

**Secure Software Development, Oracle Linux**

---

### Languages

#### **English**

Full professional proficiency

#### **Portuguese**

Native speaker

---
